

Mammela Paul-Cavallier

artiste et créatrice de matières d'or

Gilded Patinas

Tailor made creations of gilded patinas

35 years as creative craftsperson in wood gilding have allowed Manuela to perfect her skill and mastery of French and Italian ancestral gilding recipes and techniques. She is authorized by French Museums to work on the gilded patrimony.

Today she uses her knowledge to create contemporary reflections of gold leaf .

Her development has followed two paths unfolding around gold:

Gold leaf patinas creations – Manuela creates gold materials for interior decorators, luxury brands, designers and couturiers on various supports.

Artistic creation – sculpture and painting, she transforms ancestral knowledge into contemporary expressions using raw pigments and gold leaf. With her inspiration or decorator's inspirations, as paintings of abstract gold reflections.

She collaborates with Japanese artcraft since her residence at La Villa Kujoyama of the Kyoto French Institute in 2014. Japanese gave her the RIMPA label for her gilded art work.

2023 she's in residence to the Villa Albertine.NYC,CA..

By measure

By measure:

Gold leaf patinas on several materials,
with different colors of gold leaf,
with different intensity of gold reflections.
Samples and specific creation on request.

Art painting with gold leaf, by order or already created
Art work made on order for interior projects

Support:

canvas, wood , medium, bamboo...

Technics:

Manuela's workshop is a universe where alchemy and artistic creation converse and merge.

Rabbit glue, beef bile, precious pigments melting under an agate stone, XVIIth century Florentine and French recipes - a world to create contemporary gold reflections.

Ornementation

The result of 25 years of restoring gilded wood, arabesques and ornamentation created to order, with antique or contemporary patinas.

Patinas as Art Painting

The gold leaf patinas may be created as a painting, a reflection of lights.

I call it « Painting of emotion »

Creation made by measure to fit in with your project
